

WHERE IN THE WORLD?

What are the names of the countries that are shaded in dark?

What do you think they have in common?

PETERS PROJECTION

You may have noticed that these maps look different to the usual ones we see.

It is called 'Peters Projection' and was drawn by the German historian Arno Peters.

The map shows EQUAL AREA and POSITIONS.

All areas are drawn to their actual size and position. By putting all countries in their true size and location, it shows a more accurate image of the world.

Why do you think traditional maps were not drawn so accurately?
